## FEATURES & BENEFITS

### Glass Panels

- Glass panels are manufactured in Italy to the highest European quality
- All panels have a double seal process to ensure long lasting performance
- Argon, an inert gas, is used to fill voids, resulting in superior thermal resistance and less condensation
- Toughened both sides to comply with AS/NZS 2208 and AS/NZS 60335.2.89
- All panels have Low-E chemical coating that provides exceptional thermal performance, product visibility and energy efficiency
- Lowest running costs through Visualine's unique heating method (independently tested)
- Heated panels fitted with an electrical safety cut-out to protect against electrocution in the event of breakage

Options:           Stainless Steel or Colorbond infills

### Door Frames

- Extruded quality aluminium trims with fully welded corners for higher structural strength and to withstand constant commercial use
- Available in clear or black anodised finish
- Positive PVC thermal break to ensure maximum efficiency between the aluminium frame, coolroom and refrigerated environment
- Corrosion resistant hardware and full length extruded handle
- Self-closing adjustable torsion bar hinge
- Heated perimeter frame and mullions with service access from front for easy repair

Options:           Custom sizes available.  
Powder coating to your specifications

### Lighting

- Vertical high intensity fluorescent lighting
- Specially designed light diffuser to ensure maximum spread of light
- Extremely reliable magnetic lighting ballasts for long, trouble free operation

Options:           Horizontal lighting for maximum illumination.  
LED lighting for state of the art illumination, effects and long life.

### Shelving

- Zinc plated for corrosion resistance and reliability
- Extra reinforced to prevent sagging
- Built in front product stop
- Total adjustment over the full height of door
- Shelves can be tilted for gravity display

Options:           Black powder coating over zinc plated shelves  
Clip on price and product tickets  
Side and rear product rail  
Custom designed shelving to your clients requirements

## ECONOMISER RANGE - Recommended for low humidity\*, air-conditioned environments

### Description

\* Relative humidity = 75%  
Temperature = 26°C

- ❑ Lowest energy usage in the market
- ❑ Double glazed Low-E panels, Argon filled
- ❑ Clear or Black anodised frames
- ❑ Toughened glass

Door Size		1 door	2 door	3 door	4 door	5 door	6 door
